Additional Experience: Next.js, React Native, Node.js, WordPress

AI Tools: Cursor, Claude Code

PROFESSIONAL EXPERIENCE

SeaRates.com - part of DP World

Senior Frontend Engineer | Feb 2021 - Jul 2026 | Remote

- Designed and developed scalable React and TypeScript applications for complex logistics SaaS products.
- Owned frontend architecture and development for a core logistics booking application from its initial implementation, including project structure, state management, routing, API layers and reusable components.
- Modernized legacy JavaScript/jQuery solutions and supported the transition to React and TypeScript across company products.
- Built complex business interfaces involving role-based access, dynamic forms, data-heavy tables, maps, shipment workflows, finance and payments, document management and cross-module integrations.
- Integrated frontend applications with REST APIs and GraphQL and worked with Redux Toolkit, RTK Query, React Query, Webpack, Nx, Module Federation and microfrontend approaches.
- Reviewed and approved frontend pull requests across a team of around five developers, providing architectural guidance and maintaining code quality standards.
- Wrote Jest tests for React components and used component-level testing to validate UI behavior.
- Mentored junior and middle frontend developers, supported onboarding and helped engineers solve complex technical and architectural problems.
- Conducted 40+ frontend technical interviews, contributed to hiring decisions and collaborated closely with backend engineers, UI/UX designers and product teams.

SeaRates.com

Frontend Developer | Oct 2017 - Jan 2021 | Odesa, Ukraine

- Built and maintained frontend features for logistics web applications using HTML, CSS, JavaScript and later React.
- Migrated legacy JavaScript/jQuery functionality toward React-based applications and reusable UI components.
- Integrated frontend applications with REST APIs and collaborated with backend developers on API contracts.
- Designed a reusable internationalization (i18n) approach supporting around 16 languages, with translations loaded from a remote server and language selection passed into embedded React applications.
- Implemented and configured WordPress websites for clients, including server installation, theme customization, admin setup, plugin integration and embedding company applications into client sites.
- Worked with Git-based development workflows and participated in team code reviews.

Freelance

Freelance Frontend Developer (Part-time / Parallel Projects) | Aug 2016 - Aug 2025 | Remote

- Delivered commercial websites, landing pages and custom frontend solutions for different clients.
- Built responsive interfaces using HTML, CSS/SCSS and JavaScript, including custom interactive elements and animations.
- Customized WordPress websites, themes and layouts and integrated client-specific functionality.
- Managed direct client communication from requirements and implementation through improvements and delivery.
- Built a mobile application using React Native.

Inweb

Project Manager - SEO Projects | Feb 2017 - Aug 2017 | Odesa, Ukraine

- Managed SEO promotion projects for client websites and coordinated a small delivery team.
- Translated client goals and priorities into actionable tasks and coordinated delivery across multiple projects.
